## About Me

I am a Swedish national living and studying in Scotland. Being a hands-on learner, I love learning new technologies and software development methods. Everything ranging from UI/UX to back-end development. I'm looking forward to starting my career within the creative industry and to help develop fun and engaging applications. In my spare time I also work on art commissions which has developed both communicative and client-facing skills.

## Experience

### Betfred Shop Cleaner Newpin [UK]

Apr 2022 - Sep 2022

I cleaned a Betfred shop after closing every day of the week. This included: Making the shop presentable for customers and staff for the next day, vacuuming, wiping surfaces and cleaning the lavatories. This was a key holder position with flexible hours, allowing me to clean any time between the shop closing to it opening the next day.

### Hospital Cleaner Region Halland [Sweden]

Summer 2020 & 2021

Cleaned and stocked a wide variety of wards and rooms: Surgery rooms and patient wards to offices and lavatories. Time management, organization and self-initiative was hugely important to complete the cleaning schedule successfully and correctly. Individual and team effort was needed to accomplish different tasks.

I was welcomed back the following summer. I continued to advance my previously gained skills and knowledge and was a reliable and flexible team member for the cleaning department. I was trusted with more difficult tasks such as the emergency surgery ward which relied on me being on-call to quickly and neatly clean between unscheduled and scheduled surgeries.

### Sales & Information Employee Stadium Sports Camp [Sweden]

Summer 2018

I was responsible for the sales in the camp's café and shop, alongside working at the information desk following a rotating schedule. The information desk provided information for the camp's attendees and their family members during their stay. I acquired communicational and teamworking skills and attended a seminar about customer service from a local hotel employee.

## Education

2020 - Present

### University of the West of Scotland BSc (Hons) Web & Mobile Development

Currently in my 3<sup>rd</sup> year with a GPA of 3.4. The emphasis on teamwork throughout most modules, has helped develop adaptable problem solving and leadership skills. My studies so far, has provided a deepened knowledge of software development using new programming languages. Additionally, I have gained experience developing complex databases using SQL and UML. Ultimately, providing a well-rounded background as a future application developer.

## Hard Skills
